Landscape Design Template Printing Guide

Follow these steps to meet the City of Santa Rosa’s permitting requirements:

• Review the available Landscape Design Templates here: [http://www.savingwaterpartnership.org/concept-plans-and-design-templates/](http://www.savingwaterpartnership.org/concept-plans-and-design-templates/)

• Select your desired design and check the corresponding box on the Order Form. The Landscape Template plans sets consist of 10 to 12 pages depending on the design.

Select the printing option that best meets your needs and check the corresponding box on the Order Form. Both printing options are acceptable for City of Santa Rosa permitting.

**Full Plan Set Option:** Print all of the pages full size (24” x 36”).

**Partial Plan Set Option:** Planting Plan (L-1.0) and Irrigation Plan (L-2.0)* sheets in full size (24” x 36”). Application and Specification packets in letter size (8.5” x 11”) in lieu of full size pages L-0.0 and Detail Sheets.

* Native Adaptive B and Sonoma Cottage B have two Planting Plan and two Irrigation Plan pages (L-1.0 – L-2.1) that must be printed if using these templates.

We recommend color printing for the Planting Plan and Irrigation Plan pages. The color pages will help guide you through the different types of planting and irrigation areas.

• Select the Required and Optional pages for printing
• Email or bring this checklist to the print shop of your choice. A list of print shops that have received training on printing the templates and are prepared to use the Order Form can be found here: [http://www.savingwaterpartnership.org/template-printing/](http://www.savingwaterpartnership.org/template-printing/)

If you have any questions please contact Kris.Loomis@scwa.ca.gov or call (707) 524-1165 Monday - Thursday.
