About the Partnership

The Sonoma-Marin Saving Water Partnership (Partnership) represents 10 water utilities in Sonoma and Marin counties that have joined together to provide regional solutions for water use efficiency.

The utilities include the Cities of Santa Rosa, Rohnert Park, Petaluma, Sonoma, Cotati; North Marin, Valley of the Moon and Marin Municipal Water Districts; Town of Windsor and Sonoma County Water Agency (Partners). Each of the Partners have water conservation programs that can assist you in reducing your water use.

The Partnership was formed to identify and recommend implementation of water use efficiency projects, and maximize the cost-effectiveness of water use efficiency programs in our region.

The Partners are committed to remain members in good standing of the California Urban Water Conservation Council (CUWCC) and implement the Best Management Practices (BMPs) for water conservation.

Our Service Area

More than 600,000 residents in Sonoma and Marin counties rely on the water delivered from the Russian River by the Sonoma County Water Agency (Water Agency) to the nine cities and districts in the Partnership. Supplementing the water provided by the Water Agency are local supplies including recycled water, groundwater from underground aquifers and surface water reservoirs.

Recreation, agriculture and wildlife, including threatened and endangered steelhead and coho and Chinook salmon also rely on these same natural resources in order to thrive.

Realizing the importance of protecting and preserving water resources for future generations, the members of the Partnership have taken a proactive role in helping fund, maintain and implement an array of water supply, water use efficiency and fishery recovery programs.
Working Together

Every day we wake up and turn on the tap to draw water and begin our daily routine. It’s a marvel that fresh water appears instantly and this marvel is a testament to the men and women of the Sonoma County Water Agency and area retail water providers working together to insure a safe, reliable water supply is available for the residents of Sonoma and Marin Counties. Whether the water is naturally filtered from the Russian River, local ground water or surface water from local lakes, the coordinated effort to extract, treat and deliver water is often taken for granted. Conservation of precious water resources is critical as we strive to make the water available for our communities while preserving natural resources.

The Sonoma-Marin Saving Water Partnership (Partnership), through its many water efficiency programs, educational seminars and outreach campaigns, is working to educate our communities about the importance of conserving water resources and curbing water-wasting behaviors.

This year the “20-Gallon Challenge” was embraced by community members who pledged to reduce water use by 20 gallons per person per day. The 20-Gallon Challenge was promoted throughout the Russian River Watershed expanding the Partnership reach into Mendocino County. Working together in Sonoma, Marin and Mendocino counties, the 20-Gallon Challenge resulted in a positive response to the 2013 dry spring conditions.

The Partnership received a 2013 WaterSense Excellence award from the U.S. Environmental Protection Agency (EPA) for promoting water efficient irrigation practices through implementation of the Qualified Water Efficient Landscaper Program (QWEL). QWEL educates landscape professionals and their customers on the benefits of sound landscape design, management and irrigation practices. The award was one of only five issued by the EPA nationally.

The time and energy invested in the Partnership has benefitted our region. Water use during Fiscal Year 2012/13 remains down from prior years and the region has avoided water use restriction, even during an extremely dry spring. The Partnership will continue to offer educational resources, programs and incentives to aid our communities in meeting water use efficiency requirements as we work together in response to variable water year conditions and maintain supplies for beneficial use and instream needs.

Sincerely,

Jake Mackenzie, Chair
Water Advisory Committee
Council Member
City of Rohnert Park

David Rabbitt
Chair, Sonoma County Water Agency
Supervisor, County of Sonoma
Partnership Achievements By the Numbers

Fiscal Year 2012/2013

8,777 students experienced "The Musical Watershed" performed by ZunZun at 37 shows in 25 different elementary schools.

4,888 students received direct instruction, 2,679 in the classroom only program and 2,209 in the classroom and Field Study program.

501 guests visited the nine gardens that participated in the Second Annual Eco Friendly Garden Tour.

607 students graduated from the Qualified Water Efficient Landscape program and Spanish QWEL programs.

4888 rebates were issued to businesses for installing high-efficiency toilets.

356 parents were certified through the Sonoma County Green Business Program sponsored by the Water Agency.

8 businesses were chaperones for their child’s class during their field study visit to the Water Agency’s Russian River Field Study Site near Forestville. The parents participated as well as children.

16 laundry to landscape graywater systems were installed.

26,962 students in 1,133 different classrooms received curriculum materials provided by the Water Education Program.

3,558 actions were inspired by the 350 Home & Garden Challenge.

122 rebates were issued to businesses for installing high-efficiency toilets.
2,209 students participated in the Field Study Program where the 5th grade students performed water related experiments along the banks of the Russian River and learned about the riparian ecosystem.

1,771 high-efficiency clothes washer rebates were issued. These EPA EnergyStar rated clothes washers use 40 to 60% less water than older, top loading models and they save energy from heating less water and wringing out more water before the clothes go into the dryer.

433,189 square feet of lawn were removed through turf conversion programs — enough to cover nearly six professional football fields.

34,731,944 gallons of water per year are being saved by local businesses through sustained reduction programs where rebates are provided for implementing process changes and equipment upgrades resulting in measurable water use efficiencies.

180 landscapes were upgraded through our rebate programs.

695 high school students went on technical tours of the Water Agency’s facilities. Students learned about career opportunities in the field of water system and explored water related experiments along the banks of the Russian River and learned about the riparian ecosystem.

6 permitted graywater systems were installed in homes to use water from bathroom-sinks, showers, tubs and laundry to irrigate landscaping.

2,570 Water Smart Home evaluations were performed. These in-home water efficiency assessments are performed by trained technicians to find opportunities for homeowners to identify leaks and inform homeowners about their indoor and outdoor water use.

809 rebates were issued to residents for replacing their old, inefficient toilets with new, EPA WaterSense labeled high-efficiency toilets that flush at 1.28 gallons per flush or less.

110 businesses participated in our water use survey programs.

92 people attended Rainwater Harvesting classes.

180 landscapes were upgraded through our rebate programs.

Partners have pledged to fund water use efficiency programs. The baseline funding is established in the Memorandum of Understanding (MOU) and is based on historic water deliveries through the Water Agency’s water transmission system, ensuring that programs will always be available to help residents use our water resources efficiently.

Minimum funding levels are presented in the orange bar in the table below along with Fiscal Year 12/13 expenditures.

For the Town of Windsor, additional required funding paid through a direct diversion water conservation sub-charge is not included with their MOU minimum.

These additional funds are designated for the Town’s water use efficiency programs and are included in their annual program expenditures.

The Water Agency’s Water Use Efficiency Program is funded by the water contractors through the Water Conservation Sub-Charge as part of the Water Agency wholesale water rates. The amount of money deposited into the fund is calculated based on an estimate of the total costs for all regional Water Conservation Projects for each fiscal year.

The Sonoma-Marin Saving Water Partnership does not specify a minimum amount that should be utilized for regional programs.

### 2012 Temporary Urgency Change Petition

On March 29, 2013, the Water Agency submitted a report to the State Water Resources Control Board (SWRCB) in response to an Order approving a Water Agency request to modify in-stream flow requirements for the Russian River. The report highlighted two pilot projects focused on unaccounted water loss through residential meters and water use efficiency through customer awareness in addition to the Partnership’s water use efficiency efforts.

The Temporary Urgency Change Petition, submitted on April 9, 2012, was needed to improve conditions for juvenile coho and Chinook salmon and steelhead rearing in the river.

On May 2, 2012 the SWRCB issued an Order approving the petition. Included as part of the Order, the SWRCB requested that the Water Agency provide a written update regarding activities and programs being implemented by the Partnership to assess and reduce water loss and promote increasing water use efficiency. The order acknowledged the Partnership’s work to date with assigning landscape water budgets to dedicated irrigation accounts and the continued work on compiling with SBx7-7 targets.
PARTNERSHIP JOINS EPA WATERSENSE

In April of 2012, the Partnership became a Promotional Partner to the U.S. Environmental Protection Agency’s WaterSense program. Both the Partnership and WaterSense share the goal of promoting efficient water use both indoors and out.

As a Promotional Partner, the Partnership is able to collaborate with and leverage the WaterSense program’s national campaigns such as Fix-A-Leak Week and Sprinkler Spruce-Up while helping to get the word out about WaterSense labeled products and services.

The Partnership has a history of working with WaterSense since the program began, actively participating in the development of WaterSense labeling specifications to ensure that the WaterSense label only appears on high-performance, water efficient products that work. In 2008, the Partnership’s Qualified Water Efficient Landscaper Program (QWEL) became one of the nation’s first WaterSense Labeled professional certification programs. The Partnership continues to actively support and participate with WaterSense.

20 X 2020 GOALS

In 2009, SBx7-7 established a statewide goal, known as 20 x 2020, to reduce per capita water use 20% by the year 2020 with an interim goal of a 10% reduction by 2015.

The chart to the right displays 2012 per capita water use in each Partner service area and the region as a whole. The 2015 and 2020 goals are indicated by the green and red lines, respectively.

While the chart shows that all Partners are currently meeting the 2020 targets, we recognize that water use efficiency must continue. Many factors can affect water use patterns as has been seen in recent years. The overall downward trend is a result of many factors including the California drought, economy, changes in weather conditions, and active water conservation programs.

It is important to continue the work on water use efficiency to maintain the savings already achieved and make sure the region captures all the benefits of future water savings.
